Zzzzz (so relaxing!)

ElectroLotus can sweet-talk you through an entire alphabet of Health & Beauty! The recently opened Palomares clinic offers selected beauty therapies for men and women, alongside Acupuncture and Advanced Reflexology. Remove unwanted hair by waxing or electrolysis; add colour with airbrush tanning or lash tinting - **this month there is a special offer of a *FREE LASH PERM* when you book a brow and lash tint – a great opportunity to try this eye enhancing treatment at no cost and no risk.** Ring to book your free sensitivity test for the day before your tint or perm. For men, it looks natural, defining fair brows and lashes, and for ladies, it saves ‘panda-eyes’ due to perspiration or swimming and has no fibres to irritate contact lens wearers. Tinting will darken the lash from root to tip (often much lighter, especially here with exposure to sunlight) for about 6 weeks and perming ‘opens up’ the eyes for about 8 weeks, giving an natural, attractive appearance. You don’t have to be a bodybuilder to take advantage of ElectroLotus’ ***HALF-PRICE HALF-BODY TAN!*** A sun-kissed glow boosts self-confidence, making you look healthier and slimmer, and if the weather isn’t balmy enough for sunbathing, or you are concerned about skin damage through exposure UV rays, then a cosmetic tan is an ideal solution. Our professional product and airbrush application is a far cry from amateur odorous orange streaks, so treat yourself and experience what a difference adding some natural looking colour makes. Before your tan, why not book yourself in for a PHD wax to leave your legs or body smooth? Men can book a ***FREE ‘WAX- WIMP’***, to try one small area on back or chest before committing to a complete waxing! Many clients say it’s more comfortable than the old style systems, and this hygienic and disposable waxing system is the safest on the market. If you’ve some hair you want rid of permanently, then electrolysis is the answer; a few applications of the Sterex blend to an actively growing hair of any colour and it is gone for good! The holistic therapies of Advanced Reflexology and Acupuncture are beneficial for many aches and injuries or unwanted symptoms, from Asthma and allergies like hay fever through hot flushes, to sciatica, tinnitus and vertigo! For more details on the available treatments, please visit www.electrolotus.com or ring the therapists for a personal consultation or appointment.
